

SYMMETRYTM PARTNER PROGRAM

CERTIFIED PARTNER

This certificate is to show

have formally completed a product certification
through AMAG's Symmetry Partner Program for
their product

HID[®] SAFETM ACM

which is now certified with Symmetry v9.3

CERTIFICATION DATE: 3rd August 2021

MEMBERSHIP PERIOD: 1st May 2021 – 30th April 2022

SYMMETRY

This technical certificate details the supported features, unsupported features and known issues of this integration. Any known issues have been deemed as non-impacting for this certification.

The installation and configuration of this integration are detailed in the documentation provided by HID.

PRODUCT VERSION: 5.14.1.4629

PLUGIN VERSION: N/A

FIRMWARE VERSION: N/A

SYMMETRY VERSION: 9.3.58

INTEGRATION TYPE: Identity Management

ADDITIONAL VERSIONS: N/A

REQUIRED SYMMETRY LICENSES: Data Connect Module

SYMMETRY EDITION

✗ STANDARD

✓ HOMELAND SECURITY

INTEGRATION METHOD / APIS USED

✗ ADVANCED REPORTING

✓ DATA CONNECT

✗ BIOMETRIC CAPTURE BUTTON

✗ ID SCAN INTERFACE

✗ BUILT-IN SUPPORT

✗ VIDEO SDK

✓ DATABASE VIEWS

✗ XML OPEN INTEGRATION*

* MAY ALSO REQUIRE DATA CONNECT IF USING SYMMETRY PROFESSIONAL

INTEGRATION OVERVIEW

HID SAFE ACM is a highly configurable physical identity and access management system designed for assigning identities to employees, contractors and other members of staff.

SUPPORTED FEATURES

The integration uses a combination of the DataConnect API and Database Views to import and export data to and from Symmetry. This includes the importing of cardholder data such as last name, first name, employee reference and card number. The integration is also able to extract a list of access codes from Symmetry which can be assigned to identities in SAFE and automatically assigned to Symmetry cardholders on import. The access rights for each identity in SAFE are automatically assigned by location or via the SAFE compliance module.

Identities in SAFE are added to the import queue when a badge is printed. Queued identities are then imported automatically into Symmetry on a predefined basis. The same cardholder record is also inactivated in Symmetry when the card is inactivated or marked as lost in SAFE.

HID SAFE ACM is compatible with HID Fargo Connect for the printing of cardholder badges imported into Symmetry. Additional visitor management features available using HID SAFE IPVIM.

UNSUPPORTED FEATURES

The integration currently only supports the assigning of Symmetry access code based access rights.

The integration is currently only supported on Symmetry HSE and when using legacy or SR format cardholders.

FEATURE LIST

✓ ASSIGN ACCESS RIGHTS TO CARDHOLDERS

✓ ASSIGN ACCESS RIGHTS TO VISITORS

✗ EXPORT CARDHOLDERS FROM SYMMETRY

✓ IMPORT CARDHOLDER FACE IMAGE

✓ IMPORT CARDHOLDERS INTO SYMMETRY

✓ IMPORT VISITORS INTO SYMMETRY

✓ MULTIPLE CARDS PER CARDHOLDER

✓ SYNCs SYMMETRY ACCESS CODES

KNOWN ISSUES

- No known issues were found during the certification of this integration.
